SYSTEMATIZED

HELPS YOU SCALE

The MODONE series is a modular wall-mounted enclosure engineered for flexibility, ease of installation, and reliable performance.

Its flat-pack design allows efficient storage, transport, and quick on-site assembly while maintaining strength and precision.

Each enclosure is designed to ensure dimensional accuracy, smooth finish, and long-term durability.

With a reversible door and customizable configurations, MODONE offers a practical and efficient solution for modern panel-building requirements.

Developed for control, automation, and low-power distribution, MODONE performs reliably across sectors such as machinery, process control, building management, electronics, and renewable energy systems.

Design Features and Accessories

- Modular construction supplied in flat-pack form for convenient storage, transport, and quick on-site assembly.
- Single and double door configurations for compact or wider installations.
- 120° door opening with reversible orientation (LHS ↔ RHS) for flexible site installation.
- Precision-formed profiles ensure accurate alignment and smooth assembly.
- Mounting plate included as standard for easy component installation.
- Gland plates provided at both top and bottom for simplified cable entry.
- Wall mounting brackets as per Modutec standards for secure and stable installation.
- Optional accessories such as inner door, filter fans and limit switches, can be offered upon request.

Supply Includes:

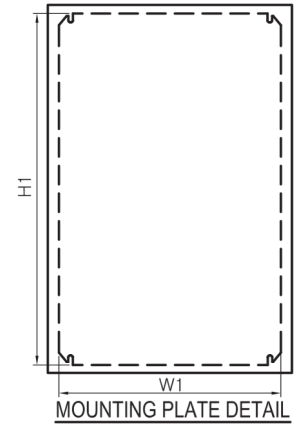

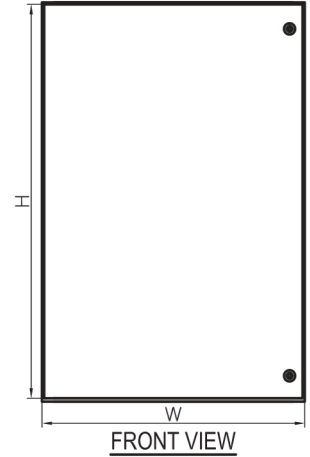

- Modular enclosure body (flat-pack assembly)
- Doors (single or double, reversible LHS ↔ RHS)
- Mounting plate – full or partial
- Gland plates – top and bottom
- Wall mounting brackets
- Accessories for inner door (if required)
- Customization on request
