HELPS YOU SCALE

MODOUT is a robust outdoor modular enclosure system designed to provide reliable protection for electrical and control equipment installed in open environments. Engineered with high mechanical strength and precision, it ensures complete safety against rain, dust, and harsh weather conditions.

The construction enables easy transportation and on-site assembly, making it an ideal solution for outdoor control panels, power distribution units, and field-mounted instrumentation. With an IP56 / IP 65, MODOUT is well-suited for industrial, infrastructure, and utility applications where durability and performance are essential

Design Features and Accessories

- Constructed from high-quality CRCA steel with corrosion-resistant powder coating for outdoor durability.
- Detachable roof canopy with drip edges to prevent water entry and offer UV protection.
- Polyurethane gasket for superior sealing performance and weather resistance.
- Gland plates, plinths, and mounting plates for flexible installation.
- Optional accessories such as ventilation kits, canopy extensions, and lifting provisions.
- Assembly hardware and earthing provisions.
- Instruction manual for on-site installation.
- Optional plinths, ventilation components and canopy extensions (available on request).

DIMENSION

SL NO	A	B	C	D	E
1	660	75/100	1920	660	100
2	840	75/100	2100	840	100
3	1020	75/100	2280	1020	100
4	1200	75/100	2460	1200	100
5	1380	75/100		1380	100

Modular technology helped us to introduce an exclusive range of outdoor

FEATURES :

- Easy to assemble & install
- World-class quality
- Rugged design
- Corrosion resistance
- Robust construction
- Smart engineering

APPLICATIONS :

- LT KIOSK
- Feeder pillar
- Electrical furnace
- VCB panel
- ACB panel
- Chiller control panel
- Compartmentalized substations
